Christabel Sarpomaa

Learning outcomes: Learning outcomes for the guest lecture are measurable and appropriate for the content and level of the class.

___10___/10

Content: Content is connected to learning outcomes and is appropriate for the content and level of the class. Content is organized in a structured and logical manner.

___10___/10

Visual aid(s): At least one well-planned visual aid is used. Visual aid is appropriate for the content and level of the class and is connected to the learning outcomes of the lecture.

___10___/10

Lecture mentor/host instructor evaluation: Feedback (both quantitative and qualitative) from the lecture mentor and host instructor indicate that the lecture was well-planned, appropriate, and well-executed.

___10___/10

Peer evaluation: Guest lecturer attends the lecture of a peer and provides meaningful and fair feedback by completing the feedback form and submitting it to their peer and me within one week following the observation.

___10___/10

Total: ___50___ /50 points

Comments: You clearly did a wonderful job with your guest lecture, Christabel! The evaluation I received from Dr. Kizer was glowing and perhaps one of the strongest I've seen since I began teaching this class! Dr. Kizer and Sheyenne both noted your preparedness, knowledge, and engaging (memorable, to use Dr. Kizer's word!) lecture. Based on your materials, it's also very clear to me how much time, effort, and care went into preparing your lecture. Your slides are excellent! Often, students struggle to determine how much info to put on slide. Yours reflect a great balance between key terms and visuals, which I'm certain enhanced your lecture. It's also noteworthy that your learning outcomes are clear, concise, and measurable. They're also appropriate for an intro course. Your evaluators' suggestions for strengthening your lecture (pacing, volume, technology use) are things that will improve with experience. Excellent job, Christabel! Our students would be so fortunate to learn from you!
